

Drivon — Manual Test Guide

Phases 1–3: accounts and vehicles, fuel tracking, maintenance and expenses. Every test is done in the app on your phone. Each one lists exactly what to type and tap, and what you should see.

Expected values were checked against the API with this exact scenario. Text in **violet** is shown by the app word for word.

Before you start

1. Start the API on your laptop and run the latest app build on your phone, as usual (see **frontend/README.md**).
 2. Use a **new account** (an email you have not registered before) so the numbers match this guide. If you repeat the guide, change the email, for example **nimal.drivon2@example.com** .
 3. Run the tests **in order and on the same day**. Later tests build on earlier ones, and dates are relative to **today**.
 4. Wherever the guide says **today**, the app shows today's date in the format **7 Oct 2026** . **Current month** means the month name and year, for example **October 2026** .
 5. Confirmation messages such as **Fill-up logged** appear briefly in a dark bar at the bottom of the screen (a snackbar). If two come quickly, the second shows after the first fades, so wait a few seconds before checking it.

How to read a test. **Steps** say what to do: *Field* → *value* means tap the field and type the value. **Expected** lists what must be true. Tick Pass or Fail and note anything odd.

Test data used throughout

Item	Value
Your name	Nimal Perera
Email	nimal.drivon@example.com
Password	Drivon2026
Vehicle 1	Toyota Aqua, 2018, registration cab - 1234 , Hybrid, odometer 45,000 km
Vehicle 2	Honda Dio, 2021, registration BGH-4521 , Petrol, odometer 12,000 km
Fuel price	Rs. 365 per litre

Phase 1 — Accounts & vehicles

1.1 Create-account checks · 1.2 Create the account · 1.3 Stay signed in · 1.4 Sign out and sign in · 1.5 Vehicle form checks · 1.6 Add the first vehicle · 1.7 Add a second vehicle · 1.8 Duplicate plate · 1.9 Odometer can't go down · 1.10 Remembered vehicle · 1.11 Delete a vehicle

Phase 2 — Fuel tracking

2.1 Tabs and empty Fuel tab · 2.2 Fill-up form checks · 2.3 First fill-up · 2.4 Top-up · 2.5 First km/L · 2.6 Another full tank · 2.7 Odometer order · 2.8 Litres from an amount · 2.9 Edit a fill-up · 2.10 Delete a fill-up · 2.11 Odometer history · 2.12 Add and delete a reading · 2.13 Correct a reading · 2.14 Raise the odometer

Phase 3 — Maintenance & expenses

3.1 Empty Service tab · 3.2 Service form checks · 3.3 Log an oil change · 3.4 Service with a next date · 3.5 Filter the history · 3.6 Free service · 3.7 Edit and delete services · 3.8 Service reading in odometer history · 3.9 Expenses tab totals · 3.10 Expense form checks · 3.11 Add expenses · 3.12 Periods and months · 3.13 Edit and delete an expense · 3.14 Compare two vehicles

Phase 1 — Accounts & vehicles

1.1 Create-account form checks

STEPS

1. Open the app. On **Welcome back**, tap **Create an account**.
2. Leave every field empty and tap **Create account**.
3. Your name → **Nimal Perera**, Email → **nimal@**, Password → **short1**. Tap **Create account**.

EXPECTED

- ✓ Step 2: under the fields: **Enter your name**, **Enter your email**. and **Enter your password**. Nothing is sent.
- ✓ The password field has the hint **At least 8 characters**.
- ✓ Step 3: **Enter a valid email, like name@example.com**. under Email and **Use at least 8 characters**. under Password.

☐ Pass ☐ Fail Notes: _____

1.2 Create the account

STEPS

1. Email → **nimal.drivon@example.com**, Password → **Drivon2026** (name stays Nimal Perera).
2. Tap the eye icon in the password field, then tap it again.
3. Tap **Create account**.

EXPECTED

- ✓ The eye icon shows, then hides, the password.
- ✓ The Garage opens with **Hello, Nimal** and the empty state **Add your first vehicle** with an **Add vehicle** button.
- ✓ The bottom bar shows **Garage, Fuel, Service** and **Expenses**, with **Garage** selected.

☐ Pass ☐ Fail Notes: _____

1.3 Stay signed in after restarting

STEPS

1. Close the app completely (swipe it away from recent apps), then open it again.

EXPECTED

- ✓ After a short loading moment the Garage opens again with **Hello, Nimal**. You are not asked to sign in.

☐ Pass ☐ Fail Notes: _____

1.4 Sign out, duplicate email, wrong password, sign in

STEPS

1. Tap the account icon (top right of the Garage).
2. Tap **Sign out**.
3. Tap **Create an account**. Enter Nimal Perera, `nimal.drivon@example.com` , `Drivon2026` again and tap **Create account**.
4. Tap **Sign in** at the bottom. Email → `nimal.drivon@example.com` , Password → `Wrong2026` . Tap **Sign in**.
5. Change the password to `Drivon2026` and tap **Sign in**.

EXPECTED

- ✓ Step 1: a sheet shows **Nimal Perera**, `nimal.drivon@example.com` and a **Sign out** button.
- ✓ Step 2: the **Welcome back** sign-in screen opens.
- ✓ Step 3: a message reads **An account with this email already exists. Sign in instead.**
- ✓ Step 4: a message reads **That email and password don't match. Try again.**
- ✓ Step 5: the Garage opens with **Hello, Nimal**.

☐ Pass ☐ Fail Notes: _____

1.5 Vehicle form checks

STEPS

1. Tap **Add vehicle**. Without filling anything, scroll down and tap **Add vehicle**.
2. Model year → `1899` , Registration number → `CAB/1234` . Tap **Add vehicle**.

EXPECTED

- ✓ Step 1: **Enter the make.**, **Enter the model.**, **Enter the model year.**, **Enter the registration number.**, **Choose a fuel type.** and **Enter the odometer reading.**
- ✓ Step 2: **Enter a year from 1900 to 2027.** (the last year is next year) and **Use up to 20 letters, numbers, spaces and hyphens.**

☐ Pass ☐ Fail Notes: _____

1.6 Add the first vehicle

STEPS

1. Fill the form: Make → **Toyota**, Model → **Aqua**, Model year → **2018**, Registration number → **cab - 1234**, Fuel type → tap **Hybrid**, Current odometer → **45000**.
2. Tap **Add vehicle**.

EXPECTED

- ✓ A message shows **Vehicle added** and the Garage opens.
- ✓ The large card shows **CAB-1234** (normalized: upper case, no spaces around the hyphen), **Toyota Aqua**, **Odometer** and **45,000 km**.
- ✓ Below it: an **Odometer history** link, a **Fuel type** tile showing **Hybrid**, a **Model year** tile showing **2018**, and an **Add another vehicle** button.

☐ Pass ☐ Fail Notes: _____

1.7 Add a second vehicle (limit of two)

STEPS

1. Tap **Add another vehicle**. Make → **Honda**, Model → **Dio**, Model year → **2021**, Registration number → **BGH-4521**, Fuel type → **Petrol**, Current odometer → **12000**. Tap **Add vehicle**.

EXPECTED

- ✓ **Vehicle added**. A switcher with **Aqua** and **Dio** appears above the card, with **Dio** selected.
- ✓ The card shows **BGH-4521**, **Honda Dio**, **12,000 km**; the tiles show **Petrol** and **2021**.
- ✓ The **Add another vehicle** button is gone and the text **You've added the maximum of two vehicles** appears instead.
- ✓ Tapping **Aqua** in the switcher shows the Toyota again; tap **Dio** to go back.

☐ Pass ☐ Fail Notes: _____

1.8 Registration numbers are unique per user

STEPS

1. With **Dio** selected, tap the pencil icon on the card (**Edit vehicle**).
2. Registration number → **cab-1234**. Tap **Save changes**.
3. Change it back to **BGH-4521** and tap **Save changes**.

EXPECTED

- ✓ Step 2: under the registration field: **You already have a vehicle with this registration number**. Nothing is saved.
- ✓ Step 3: **Changes saved** and the Garage shows **BGH-4521** again.

☐ Pass ☐ Fail Notes: _____

1.9 The odometer can't go down in the vehicle form

STEPS

1. Open **Edit vehicle** for Dio again. Read the hint under **Current odometer**.
2. Current odometer → **11000** . Tap **Save changes**.
3. Current odometer → **12500** . Tap **Save changes**.

EXPECTED

- ✓ Step 1: the hint reads **At least 12,000 km. To fix a mistyped reading, use Odometer history.**
- ✓ Step 2: **Can't be lower than 12,000 km, the last saved reading.** Nothing is saved.
- ✓ Step 3: **Changes saved;** the card shows **12,500 km.**

☐ Pass ☐ Fail Notes: _____

1.10 The selected vehicle is remembered

STEPS

1. Tap **Aqua** in the switcher.
2. Close the app completely and open it again.

EXPECTED

- ✓ The Garage reopens with **Aqua** selected (CAB-1234, 45,000 km).

☐ Pass ☐ Fail Notes: _____

1.11 Delete a vehicle

STEPS

1. Tap **Dio**, then the pencil icon.
2. Tap the bin icon at the top right (**Delete vehicle**), then tap **Cancel**.
3. Tap the bin icon again, then **Delete**.

EXPECTED

- ✓ Step 2: a dialog asks **Delete Honda Dio?** with **This removes the vehicle and its details from Drivon. It can't be undone.** Cancel closes it and nothing changes.
- ✓ Step 3: **Vehicle deleted.** The Garage shows only the Toyota Aqua, with no switcher, and the **Add another vehicle** button is back.

☐ Pass ☐ Fail Notes: _____

Phase 2 — Fuel tracking

From here on, the vehicle is the **Toyota Aqua** (added today at 45,000 km). km/L uses the **full-tank method**: the distance between two fill-ups to full, divided by all litres added after the first of them.

2.1 Fuel tab before any fill-up

STEPS

1. Tap **Fuel** in the bottom bar.

EXPECTED

- ✓ The title is **Fuel** and the Fuel tab is highlighted in the bottom bar.
- ✓ The screen shows **Log your first fill-up**, the explanation **Fill the tank to full and log it. After your next full fill-up, Drivon shows your km/L and fuel cost per km.**, and a **Log fill-up** button.

☐ Pass ☐ Fail Notes: _____

2.2 Fill-up form checks

STEPS

1. Tap **Log fill-up**. Look at the form before typing.
2. Scroll down and tap the purple **Log fill-up** button without filling anything.
3. Tap the system back button (or swipe back) to leave the form.

EXPECTED

- ✓ Step 1: the title is **Log fill-up**. **Date** shows **today**. The hint under **Odometer reading** reads **Currently 45,000 km**. The fields are Litres, Amount paid and Price per litre, with the text **Enter any two of litres, price and amount.** above them. **Filled to full** is switched on. There is a Station (optional) field.
- ✓ Step 2: **Enter the odometer reading.**, **Enter the litres.** and **Enter the amount paid.** Nothing is saved.
- ✓ Step 3: back on the empty Fuel tab.

☐ Pass ☐ Fail Notes: _____

2.3 Log the first fill-up (full tank)

STEPS

1. Tap **Log fill-up**. Odometer reading → **45000**, Litres → **30**, Amount paid → **10950**.
2. Look at **Price per litre** (don't type in it).
3. Leave **Filled to full** on. Station (optional) → **Ceypetco Kollupitiya**. Tap **Log fill-up**.

EXPECTED

- ✓ Step 2: Price per litre fills in by itself as **Rs. 365**, with the hint **Calculated from the other two**.
- ✓ Step 3: **Fill-up logged**. The Fuel tab now shows:
 - o ✓ a card **km/L comes after two full fill-ups** (no gauge yet);
 - o ✓ **This month: Rs. 10,950; Fuel cost: -** with **After two full fill-ups**;
 - o ✓ **Monthly fuel spend**: the current month (top row) Rs. 10,950, the five earlier months Rs. 0, and the footnote **All time: Rs. 10,950 on 1 fill-up, 30 L**;
 - o ✓ under **Fill-ups**: a row **Rs. 10,950 / today · 30 L · 45,000 km / Ceypetco Kollupitiya**, with no tag.
- ✓ A purple **Log fill-up** button now floats at the bottom right.

☐ Pass ☐ Fail Notes: _____

2.4 Log a top-up (partial fill), with litres calculated

STEPS

1. Tap **Log fill-up**. Odometer reading → **45200**.
2. Price per litre → **365**, then Amount paid → **3650**. Look at Litres.
3. Switch **Filled to full off**. Tap **Log fill-up**.

EXPECTED

- ✓ Step 2: Litres fills in as **10** with **Calculated from the other two**.
- ✓ Step 3: **Fill-up logged**. The newest row reads **Rs. 3,650 / today · 10 L · 45,200 km** with a grey **Top-up** tag. Still no km/L (only one full fill so far).
- ✓ This month: **Rs. 14,600**; footnote **All time: Rs. 14,600 on 2 fill-ups, 40 L**.

☐ Pass ☐ Fail Notes: _____

2.5 The second full tank gives the first km/L

STEPS

1. Tap **Log fill-up**. Odometer reading → **45500**, Litres → **15**, Amount paid → **5475** (Price per litre becomes Rs. 365). Leave **Filled to full on**. Tap **Log fill-up**.
2. Scroll the Fuel tab from top to bottom.

EXPECTED

- ✓ A gauge shows **20.00 km/L** with **Last tank**, filled all the way (this is the best tank so far). Below it: **Average 20.00 km/L** and **Best tank 20.00 km/L**.
Why 20.00: $45,500 - 45,000 = 500$ km on the 10 L + 15 L added after the first full fill = 25 L.
- ✓ **This month: Rs. 20,075; Fuel cost: Rs. 18.25 / km** (Rs. 3,650 + Rs. 5,475 over 500 km).
- ✓ Footnote: **All time: Rs. 20,075 on 3 fill-ups, 55 L**.
- ✓ The newest row **Rs. 5,475 / today · 15 L · 45,500 km** has a mint **20.00 km/L** tag. The top-up keeps **Top-up** and the first fill-up has no tag.
- ✓ Garage tab: the odometer is now **45,500 km**.

☐ Pass ☐ Fail Notes: _____

2.6 Another full tank: latest, average and best differ

STEPS

1. On the Fuel tab tap **Log fill-up**. Odometer reading → **45800**, Litres → **20**, Amount paid → **7300**, Filled to full **on**. Tap **Log fill-up**.

EXPECTED

- ✓ Gauge: **15.00 km/L / Last tank**, now only partly filled. **Average 17.78 km/L**, **Best tank 20.00 km/L**.
Last tank: $300 \text{ km} \div 20 \text{ L}$. Average: $800 \text{ km} \div 45 \text{ L} = 17.78$ (distance-weighted).
- ✓ **This month: Rs. 27,375; Fuel cost: Rs. 20.53 / km** (Rs. 16,425 ÷ 800 km).
- ✓ Footnote: **All time: Rs. 27,375 on 4 fill-ups, 75 L**. The new row **Rs. 7,300** has a **15.00 km/L** tag.
- ✓ Garage odometer: **45,800 km**.

☐ Pass ☐ Fail Notes: _____

2.7 A back-dated fill-up must fit the odometer timeline

STEPS

1. Tap **Log fill-up**. Tap **Date** and pick **yesterday** in the calendar.
2. Odometer reading → **46000**, Litres → **10**, Amount paid → **3650**. Tap **Log fill-up**.
3. Tap back to leave the form without saving.

EXPECTED

- ✓ Step 1: the calendar doesn't let you pick a date after today.
- ✓ Step 2: under Odometer reading: **For this date, enter at most 45,000 km, the reading on a later date.** (Today's readings start at 45,000 km, so yesterday can't be higher.) Nothing is saved.
- ✓ Step 3: the Fuel tab is unchanged (still Rs. 27,375 this month).

☐ Pass ☐ Fail Notes: _____

2.8 Litres from a rupee amount (exact rounding)

STEPS

1. Tap **Log fill-up**. Price per litre → **365**, then Amount paid → **5000**.
2. Tap back to leave without saving.

EXPECTED

- ✓ Litres fills in as **13.699** ($5,000 \div 365 = 13.6986\dots$, rounded to 3 decimals).
- ✓ Nothing is logged.

☐ Pass ☐ Fail Notes: _____

2.9 Edit a fill-up: a full tank becomes a top-up

STEPS

1. Tap the **Rs. 7,300** row. The **Edit fill-up** form opens with its values filled in.
2. Switch **Filled** to **full off**. Tap **Save changes**.

EXPECTED

- ✓ **Changes saved.** The Rs. 7,300 row now shows **Top-up** instead of a km/L tag.
- ✓ Gauge back to **20.00 km/L**; **Average 20.00**, **Best tank 20.00**; **Fuel cost Rs. 18.25 / km**. (A top-up after the last full tank waits for the next full fill.)
- ✓ Spend is unchanged: **Rs. 27,375** this month, **All time: Rs. 27,375 on 4 fill-ups, 75 L**.

☐ Pass ☐ Fail Notes: _____

2.10 Delete a fill-up

STEPS

1. Tap the **Rs. 7,300** row, then the bin icon (**Delete fill-up**), then **Delete**.
2. Open the **Garage** tab.

EXPECTED

- ✓ The dialog reads **Delete this fill-up? / km/L and fuel totals will be recalculated without it. This can't be undone.**
- ✓ **Fill-up deleted.** This month: **Rs. 20,075**; footnote **All time: Rs. 20,075 on 3 fill-ups, 55 L**; gauge 20.00.
- ✓ Garage odometer: back to **45,500 km** (the highest remaining reading).

☐ Pass ☐ Fail Notes: _____

2.11 Odometer history

STEPS

1. On the Garage, tap **Odometer history** (under the vehicle card).
2. Tap the first **45,500 km** row, then tap back.

EXPECTED

- ✓ Title **Odometer history** and the explanation **Readings from fill-ups, services and your own entries. A reading can't be lower than one on an earlier date or higher than one on a later date.**
- ✓ Four rows, newest first: **45,500 km** (today · From a fill-up), **45,200 km** (today · From a fill-up), **45,000 km** (today · From a fill-up) and **45,000 km** (today · Added with the vehicle). Fill-up rows also show **Tap to open the fill-up.**
- ✓ Step 2: the **Edit fill-up** form for the Rs. 5,475 fill-up opens.

☐ Pass ☐ Fail Notes: _____

2.12 Add and delete a manual reading

STEPS

1. On Odometer history tap **Add reading**. Leave Date as today. Odometer reading → **45600**. Tap **Save reading**.
2. Tap back to the Garage and check the odometer, then open Odometer history again.
3. Tap **Add reading**, set Date to **yesterday**, Odometer reading → **46000**, tap **Save reading**. Then tap back.
4. Tap the **45,600 km** row (Entered by you), tap the bin icon (**Delete reading**), then **Delete**.

EXPECTED

- ✓ Step 1: **Reading added**; a new top row **45,600 km / today · Entered by you**.
- ✓ Step 2: Garage odometer **45,600 km**.
- ✓ Step 3: **For this date, enter at most 45,000 km, the reading on a later date.** Nothing is saved.
- ✓ Step 4: the dialog reads **Delete this reading? / The vehicle's odometer will show the highest remaining reading**; then **Reading deleted**. The Garage odometer is back to **45,500 km**.

☐ Pass ☐ Fail Notes: _____

2.13 Correct the reading the vehicle was added with

STEPS

1. In Odometer history tap the **45,000 km** row that says **Added with the vehicle**.
2. Odometer reading → **44900** . Tap **Save reading**.

EXPECTED

- ✓ Step 1: the title is **Correct reading**, with the note **Fix a mistyped reading here. The vehicle's odometer always shows the highest reading, so a correction can lower it.** There is **no** bin icon (this reading can be corrected but not deleted).
- ✓ Step 2: **Reading corrected**; the row now shows **44,900 km** · Added with the vehicle. The Garage odometer stays **45,500 km**.

☐ Pass ☐ Fail Notes: _____

2.14 Raising the odometer in the vehicle form adds a reading

STEPS

1. On the Garage tap the pencil icon. Read the hint under Current odometer.
2. Current odometer → **45550** . Tap **Save changes**.
3. Open **Odometer history**.

EXPECTED

- ✓ Step 1: **At least 45,500 km. To fix a mistyped reading, use Odometer history.**
- ✓ Step 2: **Changes saved**; the Garage shows **45,550 km**.
- ✓ Step 3: the top row is **45,550 km / today · Entered by you**.

☐ Pass ☐ Fail Notes: _____

Phase 3 — Maintenance & expenses

3.1 Service tab before any service

STEPS

1. Tap **Service** in the bottom bar.

EXPECTED

- ✓ Title **Service**; the screen shows **Log your first service**, the text **Record oil changes, services and repairs. Add when the next one is due and Drivon shows it here.** and a **Log service** button.

☐ Pass ☐ Fail Notes: _____

3.2 Service form checks

STEPS

1. Tap **Log service**. Look at the form.
2. Scroll down and tap the purple **Log service** button without filling anything.
3. Odometer (optional) → **45700** , Next service at → **45000** . Tap **Log service**.

EXPECTED

- ✓ Step 1: fields **Service type**, **Date** (today), **Odometer** (optional) with **Currently 45,550 km**, **Cost** with **Enter 0 for free or warranty work.**, **Notes** (optional), then a section **Next service (optional)** with **Set a date, a mileage or both. Drivon shows the next service on the Service tab.**, **Next service date** and **Next service at**.
- ✓ Step 2: **Choose a service type.** and **Enter the cost.**
- ✓ Step 3: under Next service at: **Enter more than 45,700 km, the odometer at this service.** The type and cost messages from step 2 are still shown. Nothing is saved.

☐ Pass ☐ Fail Notes: _____

3.3 Log an oil change due again by mileage

STEPS

1. In the same form: tap **Service type** and choose **Oil change**.
2. Keep Odometer at **45700** . Cost → **9800** , Notes → **Lanka Auto Care** , Next service at → **50700** . Leave Next service date empty.
3. Tap **Log service**.

EXPECTED

- ✓ The service type list offers: Oil change, General service, Tyre rotation, New tyres, Brake service, New battery, Wheel alignment, Air conditioning, Other service.
- ✓ **Service logged.** Under **Coming up**, a lavender card reads **Oil change due in 5,000 km / Due at 50,700 km / Last done** today.
- ✓ Under **History**: filter chips (All selected) and a row **Oil change · Rs. 9,800 / today · 45,700 km / Lanka Auto Care.**
- ✓ Garage odometer: **45,700 km.**

☐ Pass ☐ Fail Notes: _____

3.4 A service due by date (no odometer)

STEPS

1. On the Service tab tap the floating **Log service**. Service type → **Brake service**. Leave Odometer empty. Cost → **4500**.
2. Tap **Next service date** and pick the date **30 days from today** (for example 6 Nov 2026 if today is 7 Oct 2026). Then tap the **x** in the field, and pick the same date again.
3. Tap **Log service**.

EXPECTED

- ✓ Step 2: the calendar starts the day after the service date. The **x** clears the date, and picking again sets it.
- ✓ Step 3: **Service logged**. The Coming up card now reads **Brake service due in 30 days / Due** + that date. Below the card a smaller row reads **Oil change due in 5,000 km / Due at 50,700 km**. (Services with a due date are listed before mileage-only ones.)
- ✓ The brake row in History shows **Rs. 4,500** and only the date (no km). The Garage odometer stays **45,700 km**.

☐ Pass ☐ Fail Notes: _____

3.5 Filter the service history

STEPS

1. Under History, swipe the chips left and tap **Brake service**.
2. Tap **Air conditioning**.
3. Tap **All**.

EXPECTED

- ✓ Step 1: only the Brake service row is listed.
- ✓ Step 2: **No air conditioning records yet**.
- ✓ Step 3: both services are listed again. The Coming up section stays the same throughout.

☐ Pass ☐ Fail Notes: _____

3.6 A free service

STEPS

1. Tap **Log service**. Service type → **Wheel alignment**, Cost → **0**. Leave everything else empty. Tap **Log service**.

EXPECTED

- ✓ **Service logged**; a row **Wheel alignment · Rs. 0** appears at the top of History. Coming up is unchanged (it set no next service).

☐ Pass ☐ Fail Notes: _____

3.7 Edit and delete services

STEPS

1. Tap the **Oil change** row. Cost → **10500**. Tap **Save changes**.
2. Tap the **Brake service** row, tap the bin icon (**Delete service**), then **Delete**.

EXPECTED

- ✓ Step 1: **Changes saved**; the Oil change row shows **Rs. 10,500**.
- ✓ Step 2: the dialog reads **Delete this service? / It's removed from the history, totals and upcoming services. This can't be undone.**; then **Service deleted**. The Coming up card is back to **Oil change due in 5,000 km**. History lists Wheel alignment (Rs. 0) and Oil change (Rs. 10,500).

☐ Pass ☐ Fail Notes: _____

3.8 A service's reading in the odometer history

STEPS

1. Garage → **Odometer history**. Tap the top row.

EXPECTED

- ✓ The rows, newest first: **45,700 km** (From a service, **Tap to open the service**), 45,550 km (Entered by you), 45,500 km, 45,200 km, 45,000 km (From a fill-up) and 44,900 km (Added with the vehicle).
- ✓ Tapping the 45,700 km row opens **Edit service** for the oil change.

☐ Pass ☐ Fail Notes: _____

3.9 Expenses tab: fill-ups and services are already counted

STEPS

1. Tap **Expenses** in the bottom bar.
2. Scroll to the bottom.

EXPECTED

- ✓ A period switch **This month | This year | All time** with **This month** selected.
- ✓ The total is **Rs. 30,575** with **Fill-ups, services and expenses** under it (Rs. 20,075 fuel + Rs. 10,500 + Rs. 0 services).
- ✓ **By category**: **Fuel Rs. 20,075** (longest bar), then **Maintenance Rs. 10,500**. Categories with nothing spent are not listed.
- ✓ **Monthly spending**: the current month Rs. 30,575; earlier months Rs. 0.
- ✓ **Expenses you logged**: **Fill-ups and services are counted automatically. Add other costs such as insurance, parking and tolls.** An **Add expense** button floats at the bottom right.

☐ Pass ☐ Fail Notes: _____

3.10 Expense form checks

STEPS

1. Tap **Add expense**, then the purple **Add expense** button without filling anything.
2. Tap the **Fuel** chip. Then tap the **Maintenance** chip.

EXPECTED

- ✓ Step 1: **Choose a category**. and **Enter the amount paid**. The category chips are Fuel, Maintenance, Repairs, Insurance, Parking, Tolls, Washing, Other.
- ✓ Step 2: with Fuel selected a note reads **Fill-ups from the Fuel tab are already counted as fuel. Use this for other fuel costs.**; with Maintenance: **Services from the Service tab are already counted as maintenance. Use this for other costs, such as parts you bought yourself.**

☐ Pass ☐ Fail Notes: _____

3.11 Add expenses

STEPS

1. In the same form: tap **Insurance**. Amount → **45000** , Notes → **Annual policy** . Tap **Add expense**.
2. Tap **Add expense** again: **Parking**, Amount → **200** , Notes → **Majestic City** . Tap **Add expense**.

EXPECTED

- ✓ Step 1: **Expense added**; the total is **Rs. 75,575**; By category: **Insurance Rs. 45,000, Fuel Rs. 20,075, Maintenance Rs. 10,500**.
- ✓ Step 2: total **Rs. 75,775**; **Parking Rs. 200** is added as the fourth category.
- ✓ Under Expenses you logged: **Parking** · Rs. 200 / today / **Majestic City**, and **Insurance** · Rs. 45,000 / today / **Annual policy**.

☐ Pass ☐ Fail Notes: _____

3.12 Periods and monthly totals

STEPS

1. Tap **This year**, then **All time**, then **This month**.
2. Scroll to **Monthly spending**.

EXPECTED

- ✓ Each period shows a total of **Rs. 75,775** (everything was logged today).
- ✓ **Monthly spending**: the current month **Rs. 75,775** with a full bar; the five earlier months Rs. 0.

☐ Pass ☐ Fail Notes: _____

3.13 Edit and delete an expense

STEPS

1. Tap the **Parking** row. Amount → **250** . Tap **Save changes**.
2. Tap the **Parking** row again, tap the bin icon (**Delete expense**), then **Delete**.

EXPECTED

- ✓ Step 1: **Changes saved**; total **Rs. 75,825**.
- ✓ Step 2: the dialog reads **Delete this expense? / It's removed from your totals. This can't be undone.**; then **Expense deleted**; total **Rs. 75,575**; **Parking** disappears from **By category**.

☐ Pass ☐ Fail Notes: _____

3.14 Compare two vehicles

STEPS

1. Garage → **Add another vehicle**: **Honda, Dio, 2021, BGH-4521** , **Petrol, 12000** . Tap **Add vehicle** (**Dio** becomes selected).
2. Open **Expenses**.
3. Tap **Add expense: Washing**, Amount → **500** . Tap **Add expense**.
4. Tap **Aqua** in the switcher at the top of the **Expenses** tab.
5. Open the **Fuel** and **Service** tabs with **Dio** selected, then with **Aqua** selected.

EXPECTED

- ✓ Step 2: the switcher shows **Aqua | Dio** with **Dio** selected; total **Rs. 0** and **Nothing spent in this period yet.** under **By category**. A **Your vehicles** card lists **Toyota Aqua Rs. 75,575** and **Honda Dio Rs. 0**.
- ✓ Step 3: **Expense added**; **Dio** total **Rs. 500** (**Washing**). **Your vehicles** now shows **Toyota Aqua Rs. 75,575** and **Honda Dio Rs. 500**, with the selected vehicle in brighter text.
- ✓ Step 4: the **Aqua** totals return (**Rs. 75,575**).
- ✓ Step 5: **Dio** has the empty states **Log your first fill-up** and **Log your first service**. **Aqua** shows its fill-ups and services as before. The vehicle you pick is the same on every tab.

Optional checks

X.1 Server not reachable

STEPS

1. Stop the API on your laptop. Close the app completely and open it again.
2. Start the API again, wait until it is running, then tap **Try again**.

EXPECTED

- ✓ Step 1: you stay signed in (the app remembers your session). The Garage shows **Couldn't load your vehicles** with a short explanation (usually **Can't reach Drivon. Check your connection and try again.**; over the USB cable it may read **Something went wrong. Try again.**) and a **Try again** button. The app doesn't crash.
- ✓ Step 2: your vehicle loads again.

☐ Pass ☐ Fail Notes: _____

X.2 Large text and back navigation

STEPS

1. In the phone's Settings, make the font size the largest, then open each tab and each form.
2. On any form, use the system back gesture or button.

EXPECTED

- ✓ Text grows. Figures such as **Rs. 18.25 / km** shrink to fit their tile and are never cut off, and nothing overlaps.
- ✓ Back closes the form without saving and returns to the tab you came from.

☐ Pass ☐ Fail Notes: _____
